

Group ideas

Take turns sharing your ideas while clustering similar or related notes as you go. Once all sticky notes have been grouped, give each cluster a sentence-like label. If a cluster is bigger than six sticky notes, try and see if you and break it up into smaller sub-groups.

① 20 minutes

TIP

Add customizable tags to sticky notes to make it easier to find, browse, organize, and categorize important ideas as themes within your mural.

Interactive Symptom Checker:

Develop an interactive symptom checker that guides users through a series of questions and visual aids to help them describe their symptoms more accurately. This engaging process can improve the accuracy of the predictions.

Health Data Visualizations:

Use data visualization
techniques to present health
data and predictions in an
easy-to-understand and
engaging format. Interactive
charts and graphs can help
users comprehend their
health status better.

Artificial Intelligence (AI) in Imaging

Utilize AI algorithms for analyzing medical imaging data, such as X-rays, MRIs, and CT scans, to identify early signs of diseases.

Daily Health Insights:

Provide users with daily or weekly health insights and tips based on their health data and preferences.

These insights can help users stay informed and motivated.

Personalized User Profiles:

Allow users to create personalized profiles where they can track their health history, set health goals, and receive tailored recommendations based on their health data.
